COMPANY
PROFILE

GRITMAX CONSTRUCTION IS A GENERAL CONTRACTOR

Specializing in concrete and structural scopes of work in the heavy civil and industrial construction industry. We can service a wide variety of sectors within South Africa.

**COMMITTED TO
CONSTRUCTION**

Our company endeavors to create repeat customers and strong partnerships.

Clients can depend on us to provide a committed, friendly, and reliable team to complete their projects.

EXPERIENCED CIVIL AND STRUCTURAL CONTRACTOR

Gritmax Construction specializes in civil and structural projects. We have experience working in demanding environments where we understand that time is of the essence for our clients.

We take pride in understanding and meeting your needs. We have knowledgeable employees who will ensure that every job undertaken will be executed expertly. You can trust our team to complete a successful project.

OUR SERVICES

CONCRETE CONTRACTORS

Gritmax Construction, a reputable concrete contractor, specializing in industrial concrete construction. Our team takes the utmost pride in their work. Not only will we complete your project on time, but it will also meet your exact specifications. We will work with you to provide a high-quality industrial concrete structure that stays within your budget and meets your deadlines.

STEEL STRUCTURES

Gritmax Construction can provide you with the design, manufacturing, transportation, and erection of your steel structure, along with sheeting, cladding, insulated panels, and top quality power-floated concrete floors. We can offer turnkey services to our clients.

SILO COMPLEX CIVIL WORKS

Before construction begins, excavation and backfilling with appropriate materials and compacting to a level where foundations are stable will usually be required. Our services include tower slabs, intake pits of various designs, ramps, weighbridge supports, aprons around silos to prevent moisture absorption, roads, turning points, foundations for structures over intake systems, and so on.

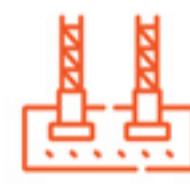

WEIGHBRIDGE CIVIL WORKS

Working closely with your Scale Company, the site preparation, levelling, compaction, formwork, and pouring of the concrete for your weighbridge foundation will be meticulously planned and executed to ensure the utmost accuracy.

CONCRETE FLOORING

Gritmax Construction specializes in high-quality power-floated concrete floors. We achieve suitable ground preparation to produce durable industrial floors through close collaboration with our clients' Engineers or our own. The floors are sealed to exact needs and specifications.

INDUSTRIAL FOUNDATIONS

The quality of your industrial foundations is critical for the next phase of your project. Gritmax Construction works meticulously to ensure durability for whichever foundation your project requires. Be it individual footings, combined footings, strip foundations, or mat foundations.
